PROFESSIONAL SUMMARY

Frontend Developer who has shipped commercial **Vue.js and React** features to **10,000+ users** at Accubits, including a **40%** cut in page load time. Since July 2025 I have designed and deployed four TypeScript frontend products with tested business logic, accessible components and responsive layouts.

TECHNICAL SKILLS

Core: TypeScript, JavaScript (ES6+), HTML5, CSS3
Frameworks: Vue.js, React, Next.js, Redux Toolkit, React Context, Tailwind CSS, Radix UI, Material UI
Architecture: Component-based architecture, design systems, state management, REST API integration
Performance and UX: Profiling, code splitting, lazy loading, responsive design, web accessibility (keyboard navigation, focus management, reduced motion)
Testing and Delivery: Jest, Playwright, unit testing, code reviews, Git, CI/CD, Vite, webpack, Vercel, AWS (S3, Lambda)
Collaboration: Agile, Scrum, working with Product, Design and backend engineers
Spoken: English (Fluent)

PROFESSIONAL EXPERIENCE

Independent Software Engineer | Berlin, Germany Jul 2025 - Present

- Designed, built and deployed four TypeScript frontend products (see Projects), with business logic in plain TypeScript reducers covered by unit tests.
- Built keyboard-operable, responsive UIs with Radix primitives, non-colour status cues, reduced-motion support and mobile drawer layouts.

Relocation to Germany and M.Sc. Data Science | Berlin, Germany Sep 2023 - Jul 2025

Implementation Consultant | ThoughtSpark | India Apr 2023 - Sep 2023

- Turned unclear client requirements into data models, workflow logic and validation rules with Product and Engineering.

Software Engineer, Frontend | Accubits Technologies Inc. | India Apr 2022 - Apr 2023

- Shipped customer-facing frontend features in TypeScript for client products used by **10,000+ users**, in cross-functional teams of 8 to 12 (design, QA, backend, frontend, management), on REST APIs and microservice backends.
- Built features in both **Vue.js** and React across client projects, including a confidential application (code under NDA).
- Cut page load time by 40% through profiling, code splitting and lazy loading.
- Built reusable, accessible components from Figma designs and took features through Jest tests, code review and CI/CD to release.

Software Developer Intern | Accubits Technologies Inc. | India Dec 2021 - Apr 2022

- Implemented TypeScript features from system designs, with REST API integration, validation and unit tests.

PROJECTS

FutureGrail | Luxury watch and collectibles auction platform (Accubits, team of 12) | Live

- Built auction and catalogue UI in Next.js, TypeScript and Redux Toolkit; about **30%** faster loads through lazy loading, component reuse and fewer requests.

HealthierU | Healthcare platform for a Dubai-based client (Accubits, team of 8)

- Built the React frontend for online video consultations (Agora SDK) with appointment scheduling.

Contract Lab | API contract review tool | Live

- Classifies each schema change as breaking, risky or safe, flags only affected consumers and blocks merges until they acknowledge; exports OpenAPI 3.1.

Agent Trace | AI agent run debugger | Live

- Replays seeded agent runs step by step with a latency waterfall, compares two runs side by side and re-scores history when budgets change.

Access Lens | Role-based access designer | Live

- Permission matrix with per-cell draft diffs, seven least-privilege checks, four-eyes approvals, a permission simulator and CSV audit export.

OpsPilot | Incident operations workbench | Live

- Decision queue with safe-window deadlines, SLA timers, live error-budget burn and keyboard shortcuts for triage.
